

Mobile Dialer

In the era of smartphones our app provides real added value to your existing calling card products. Offer your customers the chance to make calls more easily and conveniently using Mobile Dialer, and optimize your minute volumes and profit!

Mobile Dialer is a mobile application for the Android and iOS operating systems. With this app you can offer your end users a simple and convenient way to make phone calls using your Calling Cards and xy-Cards.

The app takes care of the necessary telephone number and PIN inputs for your end users, provided there is a working data connection. Only a one-time registration and/or PIN entry is required. It supports 3G/4G and GPRS standards. Using the call history and credit display, users will have full control of costs at any time.

Calling cards can also be charged directly from the app (currently only Android). It is as easy as possible to make calls; Mobile Dialer accesses the device's phone directory, and eliminates having to select the destination number.

With the app you may create an individual design and choose between call through, call back, VoIP and text messaging services. All cards generated on our platform can be accessed via Mobile Dialer.

Benefits at a Glance:

- ✓ **White Label Solution: Custom logo and colors**
- ✓ **Services are device-independent (Android, iOS)**
- ✓ **Ease of use for your end users**
- ✓ **Tap into unexploited potential customers**
- ✓ **Excellent Call Quality**
- ✓ **Call Through, Call Back, VoIP and Text Messaging**
- ✓ **No setup or configuration needed**
- ✓ **Simple distribution of app via QR-Code**

CONSECUTIVE COSTS

| | |
|---|---------|
| Updates and Upgrades ^{4) 5)} | \$ 0.00 |
|---|---------|

1) Registration and developer fees are payable to the respective provider (Apple or Google), not to 42com.

2) Included, so far as the accounts of Apple and Google are managed by 42com. If this is not the case, the upload of new app versions can not be ensured. The creation of the necessary provisioning files (profiles, screenshots, versioning, etc.) will then be charged separately.

3) Creation custom graphics, fonts and naming (incl. color and logo customization).

4) Up to three updates a year for new features and/or bug fixes.

5) Minimum monthly revenue of \$ 14,000.00 (if applicable additional to existing revenues). If the monthly revenue falls below, an additional amount of \$ 215.00/month is charged.
