

Telecom Solutions

Together with 42com as a strong partner, you have a variety of options to manage your callshop effectively. Our solutions give you a competitive advantage creating calling card products according to your needs. All you need is our low cost management and billing platform 42one, which allows you to adjust prices flexibly, select a suitable routing model and to control all actions in real time.

With uncountable numbers of reliable VoIP offerings in the internet and various App solutions the voice market became even more competitive. In order to satisfy your customers you need to place a user-friendly service offering.

With our App “Mobile Dialer” we offer you a customized White Label Solution designed to meet your own specific needs and ideas. From the individual choice of telephony services (call back, call through, VoIP, SMS) to the design of the

application – you decide how your end customer app will look! And with 42call SMART we offer you a readymade business model that allows you to develop the internet as a sales channel for your voice products. Convince yourself and learn more about our telecom products!

Benefits at a Glance:

- ✓ White Label Solution
- ✓ Individual Routing Models
- ✓ Excellent Call Quality
- ✓ Real-time Billing
- ✓ Low Rates
- ✓ Several Statistical Functions

Callshop

Our callshop solution is for providers who need an effective system for monitoring and managing callshop networks and want all services at attractive prices from a single source. In addition to being used from callshops, all applications can be used for other Point of Sales (POS), business customer connections or any subscriber administration purpose.

Benefit from our years of experience as a leader in callshop solutions and build your market share steadily with us. We offer you more than just a technical solution: by offering a variety of international carriers we allow you to seize the opportunities of the global ICT market such that you can always offer competitive and appropriate rates.

Our cloud-based management and billing platform 42one plays a central role. Through our system, you can create and connect POS, set flexible prices, calculate and terminate calls inexpensively and with outstanding quality as well as and constantly control all operations in real time. You can choose between the managed routing of 42com or self routing under your own responsibility. And the best part is: Our web-based billing software, used for your callshops, taxi phones, tele-boutiques and other outlets, such as markets and cyber cafés, is available for free!

Calling Card

With 42com as a strong partner, you have a variety of options to create your own calling cards and align your company with the exact needs of your customers and steadily expand and optimize your revenue streams.

In addition to the classical calling card, we also offer you a pioneering call through product that you can showcase to your distributors as a viable alternative: Our xy-Card! Because of the pervasive use of smart phones in everyday life, the telecommunication market has increasingly shifted to digital distribution. With our new PIN less product, you can customize virtually everything yourself – without any logistical complexities to overcome. No printing orders, no shipping and no questions regarding the location of your cards or their scheduled delivery times.

Through our web-based management and billing platform 42one, you can configure your calling cards and xy-Cards from any location independently. In addition to numerous statistical functions, you can use other features such as real-time accounting of all transactions, flexible settings for pricing and language options. You will also benefit from our wide range of call termination offers, individual routing models for your retail traffic and obtain the best quality at very attractive prices per minute!

Company

42com International Inc. is an American company located in Buffalo (New York, U.S.A.). As an Information and Communication Technology (ICT) Service Enabler the company positions itself in the value chain of telecommunications between network operators and telecommunications service providers.

Already more than 130 companies of all sizes, from various industries and countries count themselves among the valued customers of 42com. These companies use numerous applications of the 42one platform as the foundation for their successful business to operate and market their own telecommunications services or to utilize the enormous savings potential which arises from optimizing their infrastruc-

ture costs. The portfolio of 42com includes the familiar telecom solutions as well as a comprehensive wholesale offering for telecom operators and retail service providers.

The basis for your successful business is our highly accessible web-based customer management and billing platform 42one. With 42one we enable you to control all technical and managerial aspects of advanced telecommunications services in real time. The convergent billing from the cloud includes, for example, fixed line and VoIP telephony, interactive voice response and intelligent routing management. Based on the modular architecture of the system, we guarantee maximum flexibility in the design of products, tariffs and services.
